

# Featured Products Slider

## User Guide

Thanks you for purchasing this extension.

### I. Installation Guide

Please make sure your Magento store comes ready before you integrate our extensions. If your store has not been available yet, get it quickly following [Magento Installation Guide](#)

You just need follow steps below to get our extensions ready for your Magento store:

**1.** Upload folders **app**, **js** and **skin** from our download package to your Web server's document root (from here on, referenced as *{docroot}*). These files will overwrite default folders **app**, **js** and **skin** in your Magento folder, you should see a directory layout like this:

```
{docroot} /magento/app/  
index.php  
js/  
lib/  
LICENSE.txt  
media/  
pear/
```

skin/

var/

2. Login your Magento Admin area (ex: access Magento Admin area on a stage localhost:<http://localhost/magento/index.php/admin/>)

3. Navigate to **Magentothem > Featured Products Slider > Configuration**. You will see installed Featured Products Slider extension, click extension's name tab to go to extension configuration page.

## II. Configuration

1. Please make sure **Featured Products Slider** extension get installed properly

2. Login your Magento Admin area

3. Navigate to **Magentothem > Featured Products Slider > Configuration** and configure default criteria as per screenshot below:

You can repeat steps above to configure **Featured attribute** for other products

4. Default the Featured products slider display in content cms homepage.

If you want change position display module you go to  
*app/design/frontend/default/default/layout/featuredproductslider.xml*

Then change reference

```
<reference name="content">
```

```
<block type="featuredproductslider/featuredproductslider"
name="featuredproductslider"
template="magentothem/featuredproductslider/featuredproductslider.phtml" />

</reference>
```

To

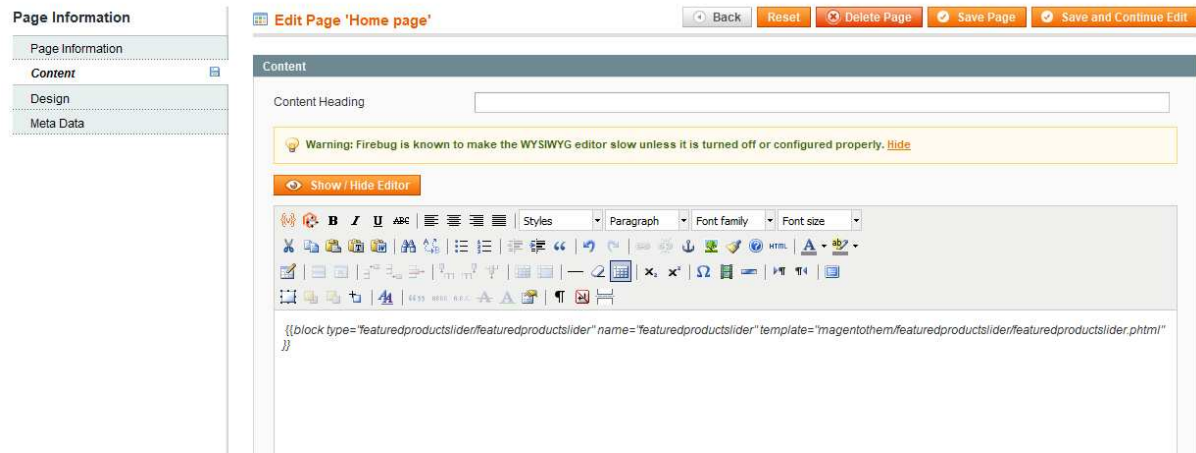

```
<reference name="New position">

    <block type="featuredproductslider/featuredproductslider"
name="featuredproductslider"
template="magentothem/featuredproductslider/featuredproductslider.phtml" />

</reference>
```

If you want the extension display on **cms page** or **static block** you can using command:

```
{{ block type="featuredproductslider/featuredproductslider"
name="featuredproductslider"
template="magentothem/featuredproductslider/featuredproductslider.phtml"}}
```

The extension will be displayed frontend:

Now see how it work on live demo
